ZERO CHIPPING SEAM SOLUTIONS

ADI ZERO CHIPPING SEAM SOLUTION

Three step solution for producing perfect masons mitres with zero chipping. The mason's mitre allows the appearance of a mitre joint to be created with much less waste than occurs with a common mitre joint, in which triangular sections must be removed from the ends of both joint members.

ABOUT ADI CNC PROFILING TOOLS

Discover the true economy of high quality tools. Seven lines of profile tools cover every application for modern bench top fabrication:

Whether you require a tool for fast processing of straight edges or a tool for profiling a tight internal radius, there is a suitable tool within the ADI range.

TopLine STONE DIVISION

Minimum diameter of 105mm

FastLine STONE DIVISION

Up to diameter of 104mm

TwistLine STONE DIVISION

Minimum diameter of 40mm

MicronLine STONE DIVISION

Minimum diameter of 20mm - Available in:
Up (U) Down (D)

NanoLine STONE DIVISION

Polishing tools for small radii.

NinjaBlades STONE DIVISION

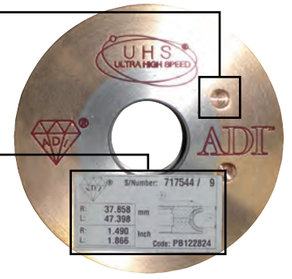
Pre-cutting tool

UCSLine STONE DIVISION

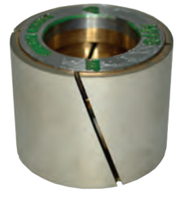
Tools specifically designed for Ultra Compact Surfaces and Sintered Stone..

- **UHS technology**
  A break-through in metal bond formulation
  ADI's new Ultra High Speed tools are capable of feed rates up to four times that of regular metal bonded tools.
- **Unsurpassed tool life**
  ADI metal bond tools yield the highest tool life and the lowest cost per meter of edge-work in the industry.
- **Precisely engineered water slots**
  The intricately machined water slots provide superior water-cooling and hence superior finish and tool life.
  The process of machining the slots is time consuming and costly but hugely beneficial for your production.

- **Profile integrity**
  You can be sure that every time you purchase an ADI profile wheel it will have precisely the same profile.
- **Precision balancing**
  Every ADI profile is dynamically balanced to ensure vibration-free operation.
- **Preset labels**
  Accurate dimensions printed on each tool save valuable set-up time.
  Each individual tool is measured to an accuracy of 0.001mm.



- MFP5
  - » Dramatic line reduction
  - » Robust solution to minor mistakes
  - » Possibility to be repaired
  - » All shapes available
  - » Longer life
  - » Optimal Integrity of shape



- EXPRESS
  - » Better gloss
  - » Longer life
  - » Limited orange peel
  - » Easy start-up
  - » Only 2 positions instead of 3

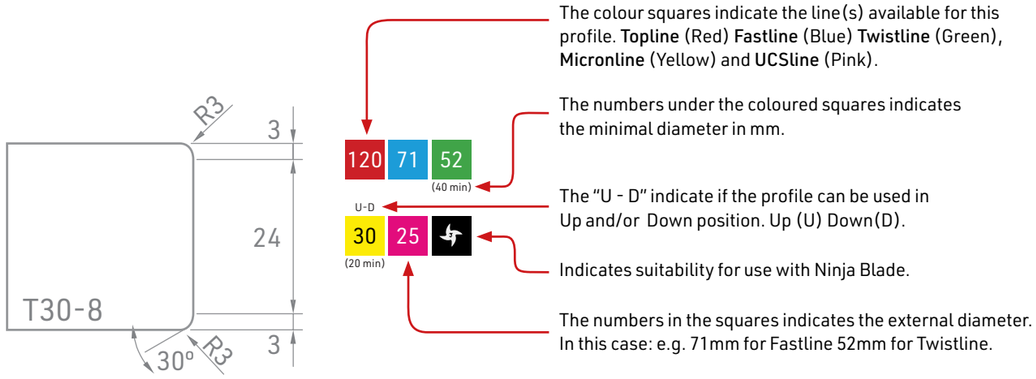
EXAMPLE OF PROFILE INFORMATION



The colour squares indicate the line(s) available for this profile. **Topline** (Red) **Fastline** (Blue) **Twistline** (Green), **Micronline** (Yellow) and **UCSline** (Pink).

The numbers under the coloured squares indicates the minimal diameter in mm.

The "U - D" indicate if the profile can be used in Up and/or Down position. Up (U) Down(D).

Indicates suitability for use with Ninja Blade.

The numbers in the squares indicates the external diameter. In this case: e.g. 71mm for Fastline 52mm for Twistline.

Please note all diagrams are for illustrative purpose only and are not to scale.
All diagrams are in the 'Up' position, if the tool is only available in a 'Down' position, the diagram will be the inverse of what is displayed.

ADI'S RE-DRESSING PROGRAM

MAXIMISE THE LIFE OF YOUR DIAMOND TOOLS!

ADI are the European leaders in industrial diamond tools. Made in Italy, ADI are renown for producing the highest quality diamond tools for stone, ceramics, mechanics, glass and optics industries. ADI's dedication to quality and service has seen them offer their customers an exclusive re-dressing service with a fast turnaround time.

ADI's re-dressing program is designed to provide customers with a cost-effective solution for rejuvenating their worn-out diamond tools. The program involves taking customers' used diamond tools and re-dressing them to restore their original profile and performance. Conducted in ADI's USA factory, the re-dressing process is carried out using advanced machinery and tools, and the result is a tool that performs as good as new but at a fraction of the cost of buying a new one.

Each tool undergoes a complete technical analysis by an ADI certified technician. The tool is then measured, logged and undergoes the precision process of electrical discharge machining, then re-shaping and re-dressing the tools to their original factory specifications.

Overall, ADI's re-dressing program helps customers save money by extending the life of your diamond tools and reducing your overall tooling costs.

THE ORIGINAL

3x
more holding power

Power Lock

The new Pica-Dry® with newly developed Power-Lock mechanism offers a 3x higher and longer holding power than its predecessor – the best in its class until now. This reduces the possibility of the lead slipping in during long-term use to a minimum.

Optimized design

New grip zones support the pull out and enhance the haptic experience.
The sealing ring gives the closure a noticeable end point.

The new grip zone is a significant improvement for orientation.

CLEANSPACE ULTRA PAPR

CleanSpace ULTRA is the latest addition to CleanSpace Technology's advanced range of respiratory protection products: designed for industrial use where water tolerance is required (IP65 Rating).

CleanSpace ULTRA is a powered air purifying respirator (PAPR) that offers superior protection against dust and gas airborne hazards. With no hoses or heavy waist-mounted battery packs making it the most comfortable and easiest PAPR in the market.

- Lightweight, compact and comfortable (< 450g / 1lb)
- One power button for simple operation
- AirSensit™ Technology allows mask pressure control and breath responsive airflow, filter and battery life management
- Intelligent Management Filter Technology (IMFT): filter life optimisation and real-time insights
- Mask-release and adjust buttons suitable for gloved hands
- Long run time and short battery recharge time
- Long term storage technology maintains battery charge for 1 year
- IP 65 Rating: Resistant to dust and liquid ingress

- Suitable for decontamination showers and high water use environments
- Compatible with CleanSpace SMART App (available at Google Play and Apple App stores)
